

ESLAM ABBAS

IT System Engineer

Cairo, Egypt | eslam.abbas.jobs@gmail.com | 01004802080 | linkedin.com/in/eslam-abbas

PROFESSIONAL SUMMARY

Results-driven IT System Engineer with 5+ years of experience managing enterprise IT infrastructure, including Windows Server environments, network systems, and virtualization platforms (VMware ESXi). Demonstrated expertise in Active Directory administration, firewall and VPN configuration (FortiGate, Sophos), and performance monitoring (PRTG) to ensure high system availability. Distinguished by the ability to identify operational inefficiencies and independently design, build, and deploy custom software solutions — including a fingerprint management platform, an IT asset & ticketing system, and infrastructure automation tools — that streamlined operations across multiple branches and reduced manual workload company-wide. Combines strong hands-on technical support with an automation-first mindset focused on continuously improving IT service delivery.

PROFESSIONAL EXPERIENCE

IT System Engineer — IMTENAN Group

Jan 2026 – Present

- Manage and maintain servers and virtual environments (VMware ESXi); administer Windows Server services (Active Directory, DNS, DHCP).
- Monitor system and network performance using PRTG to ensure high availability and proactive issue detection.
- Manage user accounts, permissions, and group policies; resolve incidents through ITSM/Helpdesk ticketing systems.
- Provide technical support for end-users (hardware & software troubleshooting) and perform regular system backups to ensure data integrity.
- Configure and manage FortiGate firewalls, including site-to-site VPN setup for secure branch connectivity.

Key Projects — Internal Tools Built to Automate IT Operations

- **Fingerprint Device Sync Platform:** designed and built a Flask-based system to manage ZKTeco fingerprint devices across all branches from a single dashboard, including remote fingerprint-template transfer between devices — eliminating the need for on-site enrollment visits to every branch and cutting new-employee onboarding time company-wide.
- **IT Assets & Ticketing Tracker:** developed a full internal asset and ticketing management system with automatic email-to-ticket classification, Active Directory user sync, Snipe-IT integration (hardware, licenses, accessories), and per-user admin audit logging — centralizing IT request handling across the organization.
- **DVR/NVR Time Sync Tool:** built a tool integrating with the Hikvision ISAPI to test connectivity and synchronize the system clock across all DVR/NVR units in one action, replacing manual per-device configuration.
- **Hardware Health & Inventory Automation:** wrote a PowerShell automation script that remotely scans every domain-joined machine to report disk health (SMART data with failure-prediction analysis), RAM specs, and full Active Directory OU inventory — giving the team a data-driven basis for hardware replacement decisions instead of manual per-device checks.

IT System & Network Engineer — Fathallah Beit El Gomla

Mar 2022 – Jan 2026

- Optimized IT infrastructure, ensuring reliable network connectivity across 10+ branches and central administration.
- Configured and managed Sophos VPN for secure remote access, reducing connection downtime by 25% and strengthening network security.
- Troubleshoot 200+ hardware, software, and network issues annually, reducing resolution time and improving system uptime.
- Delivered senior-level IT support and end-user training, resolving 150+ technical support tickets monthly and increasing team productivity by 20% through proactive issue resolution.
- Configured and monitored IP-based surveillance systems (IP cameras, CCTV), integrating them with existing network infrastructure.

IT Specialist — Carrefour Egypt

Mar 2021 – Mar 2022

- Provided on-site IT support for store operations, including POS systems, network connectivity, and end-user hardware/software issues.
- Maintained store IT infrastructure and coordinated with central IT to ensure minimal disruption to daily retail operations.

IT Support — Military Service — Egyptian Armed Forces

Feb 2020 – Mar 2021

- Provided IT support within a structured environment, ensuring uninterrupted daily operations for 100+ end-users.

- Maintained and supported hardware/software systems, reducing downtime by implementing preventive maintenance.

EDUCATION

Bachelor of Computer Science — Higher Technological Institute (HTI), 10th of Ramadan, Egypt — 2019

CERTIFICATIONS & COURSES

- Cisco Certified Network Associate (CCNA)
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+ | CompTIA Network+
- VMware vSphere
- VMware Horizon (Currently Studying)
- Python Web Development | HTML, CSS, JavaScript
- Microsoft Office Suite (Word, Excel, PowerPoint, Access)

SKILLS

Technical Skills

- Windows Server Administration (Active Directory, Group Policy, User Management)
- Network Management (Sophos VPN, Leased Lines, Managed Switches)
- Firewall Management & Site-to-Site VPN (FortiGate)
- Virtualization (VMware vSphere) | Monitoring Tools (PRTG) | Ticketing Systems (ITSM/Helpdesk)
- Scripting & Automation: Python (Flask, REST APIs), PowerShell (remote CIM/WMI automation)

Soft Skills

- Problem-solving and analytical thinking | Communication and teamwork | Adaptability and continuous learning

LANGUAGES

Arabic — Native | English — Professional Working Proficiency
